Keylate[®] Cobalt Cotton

Keylate[®] Cobalt

Active Ingredients

Total Nitrogen (N)..... 4.0%

Cobalt (Co).....5.0%

- Research on cobalt has shown it to be an essential component of several enzymes and co-enzymes that can affect the growth and metabolism of plants.
- Stoller's Keylate[®] Cobalt has low corrosivity and is rapidly absorbed by the root system or foliage because of its unique chelating complex.
- Keylate[®] Cobalt has a very low salt index.
- Research into cobalt nutrition of plants has shown that it is not only an essential nutrient for nitrogen fixing bacteria, but is also beneficial, and possibly essential to numerous non-legume plants.
- Keylate[®] Cobalt also helps mitigate yield-robbing abiotic stress.
- Compatible with most fungicides, herbicides and insecticides

COTTON PROGRAM

Crops	Application Timing
Cotton	4 ounces at pinhead square

*Always read and follow label directions.
Conduct a "Jar Test" using all products in
proper proportion in order to establish
physical compatibility.*
