THE PLANT GROWTH REGULATOR SOLUTION

X-Pand™ is an organic plant growth regulator which has been registered with the United States EPA. It is primarily used to increase the sizing of cells within the plant tissue, causing an increased size in all plant parts. It also delays ripening which protects the fruit against forced ripening and yields a longer shelf-life during periods after harvest.

PRODUCT BENEFITS

- Enhances root and shoot elongation
- Increases size and elongates grape clusters
- Reduces rind creasing and delays aging in Valencia oranges
- Prevents pre-harvest drop of citrus
- Increases fruit set of berries
- Reduces “blind” nodes in tart cherries
- Provides uniform sprouting and maximizes production of seed potatoes
- OMRI Listed

ACTIVE INGREDIENTS

Gibberellic acid (GA₃) 12.0%

Other Ingredients: 88.0%

RECOMMENDED FIELD APPLICATIONS

See the label for more information about specific crops, rates and timing.

SEED

SOIL

FOLIAR

IRRIGATION
