SET THE FOUNDATION FOR HIGHER YIELDS

Load™ is a foliar applied micronutrient and is non-phytotoxic when used as directed. Load is designed to be used on all flowering crops and results are usually greater when used during stressful growing seasons.

PRODUCT BENEFITS

- Helps manage the transport of sugar within the plant
- Reduces issues caused by excessive nitrate nitrogen in the plant by aiding in converting it to a more usable nitrogen form
- Assists the crop during stressful conditions with needed nutrients
- Increased yield in fruit and higher sugar content
- More income per acre

ACTIVE INGREDIENTS

Total Nitrogen (N) 2.0%

2.0% Water Soluble Nitrogen

Boron (B) 7.0%

Molybdenum (Mo) 0.004%

RECOMMENDED FIELD APPLICATIONS

See the label for more information about specific crops, rates, and timing.
