

MICRO-PLUS™ COPPER

STOLLERUSA.COM

Micro-Plus™ Copper is formulated for soil and foliar application. When used with polyphosphate-containing fertilizers, dilute with nitrogen solution before addition. Micronutrient deficiencies usually occur when plants are small; therefore, micronutrients should be added to the fertilizer at or before planting.

PRODUCT FEATURES/BENEFITS

- Aids in the development of plant structure
- Aids in plant growth
- Plays an important role in the formation of pollen and seed

GUARANTEED ANALYSIS

Stoller products are designed to help plants function more efficiently. Stoller products are not replacements for sound agronomy and fertility programs. They work in concert with good farming practices to help the plant realize its true yield potential.
